Präparier- und Ligaturscheren Dissecting- and Ligature Scissors

Speziell zum Schneiden von Nahtmaterial:

- Schneiden mit aufgeschweißtem Hartmetall für erhöhte Standzeit
- fein gezahntes Blatt verhindert ein Herausrutschen des Nahtmaterials
- weit auslaufender Schluss verhindert ein Einklemmen oder Verfangen des Nahtmaterials
- weit ausgestellte Griffbranchen für optimierte Handhabung

Especially for the cutting of suture material:

- blades with welded hard metal for extended lifetime
- fine serrated blade prevents the slipping of suture material
- smoothly widening lock design prevents the suture material from getting caught in the parts of the scissors
- flared shanks for optimized handling

Streamline

Der Streamline-Schluss bietet Vorteile:

- durch den geschwungenen Schluss verfängt sich der Faden nicht mehr, sondern gleitet über die Oberfläche
- weniger reparaturanfällig

The Streamline lock offers advantages:

- *because of the curved lock design the suture does not get caught and slides over the surface*
- *less prone to repairs*

Darmscheren
Enterotomy Scissors

Ligaturscheren Ligature Scissors

Speziell zum Schneiden von Nahtmaterial:

- Schneiden mit aufgeschweißtem Hartmetall für erhöhte Standzeit
- fein gezahntes Blatt verhindert ein Herausrutschen des Nahtmaterials
- weit auslaufender Schluss verhindert ein Einklemmen oder Verfangen des Nahtmaterials
- weit ausgestellte Griffbranchen für optimierte Handhabung

Especially for the cutting of suture material:

- blades with welded hard metal for extended lifetime
- fine serrated blade prevents the slipping of suture material
- smoothly widening lock design prevents the suture material from getting caught in the parts of the scissors
- flared shanks for optimized handling

Allgemein

Merkmale unserer bipolaren Scheren:

- Die Stromzufuhr erfolgt über eine Steckverbindung an nur einem Griff der Schere, die Handhabung während des OP's wird dadurch extrem erleichtert.
- RUDOLF Bipolare Scheren ermöglichen das Schneiden und Präparieren bei gleichzeitiger Koagulation.
- Unterschiedliche Arbeitslängen und zwei Versionen (Standard und schlank) erlauben den Einsatz für eine Vielzahl von Anwendungen.
- Die spezielle Konstruktion macht sie besonders reparaturfreundlich.
- Die Scherenschrauben dienen der Stromführung von einem auf das andere Scherenblatt, die Scherenblätter mit Voll-Keramik-Einlage können voneinander getrennt und nachgeschärft werden.

General information

Features of our bipolar scissors:

- *The power is supplied by means of a plug-in construction to one ring only. This simplifies handling during the operation considerably.*
- *RUDOLF bipolar scissors enable cutting and dissection with simultaneous bipolar coagulation.*
- *Various working length and two versions (standard and slim) allow the scissors to be used for a large number of applications.*
- *The special construction ensures that the scissors are easy to repair.*
- *The screws conduct the current from one blade to the other, the blades with a solid ceramic insert can be separated for re-sharpening.*

Allgemein

Merkmale unserer bipolaren Pinzetten:

- Lieferbar mit Flachstecker, auf Anfrage auch mit 2-Pin-Stecker (US-Standard).
- Präzise schließende Arbeitsenden gewährleisten ein sicheres und schonendes Arbeiten.
- Die schlanke und feine Formgebung garantieren ein sicheres Arbeiten auch in besonders delikaten Einsatzbereichen bzw. an schwer zugänglichen Stellen.
- Die breite, geriefte Grifffläche ermöglicht eine sichere Handhabung.
- Die bewährte und äußerst beständige Isolationsbeschichtung gewährleistet die Sicherheit des Instrumentes.
- Unser Kunststoff-Sicherheitsstecker garantiert eine glatte Steckverbindung und damit sicheren elektrischen Kontakt.

NON-STICK Pinzetten:

NON-STICK Pinzetten verhindern das Verkleben des koagulierten Gewebes mit der Pinzettenspitze. Dafür sorgen spezielle polierte Edelmetallspitzen mit einer exzellenten Wärmeleitfähigkeit. Diese Antihafteigenschaften bleiben auch nach einem evtl. Nachpolieren erhalten, da die gesamten Pinzettenspitzen aus Edelmetall hergestellt sind und es sich nicht nur um eine Beschichtung handelt.

General information

Features of our bipolar forceps:

- Available with flat plug, on demand also with 2-pin-plug (US-Standard).
- The precise closing of the jaws ensures safe and gentle working.
- The slim and delicate design grants safe working in extremely delicate areas or in hard-to-reach places.
- The broad, rifeled surface of the handle ensures safe handling.
- The well proven and extremely durable isolation coating grants the safeness of the instrument.
- Our plastic-safety plug grants a smooth plugging and therefore a safe electric contact.

NON-STICK Forceps:

The NON-STICK forceps prevents the sticking of coagulated tissue on the forceps tips. This is possible due to specially polished tips made of precious metal having an excellent heat conductance. These anti-adhesion properties are not lost even after a possible re-polishing, due to the fact that the complete tip of the forceps is made of precious metal and it is not only a coating.
